EDUCATION

UX/UI Design Professional Course
w.academy · Talent Garden · Consorzio Meridia
Dec 2023 – Mar 2024

Master in Multimedia Languages & Technologies
ELIS College, Rome
Web 2.0 Focus

PROFESSIONAL SUMMARY

Detail-oriented Product Designer with over 7 years of experience crafting user-centric digital interfaces and seamless digital experiences. Uniquely combining high-fidelity UI design (Figma) with deep expertise in front-end architecture (HTML/CSS) and advanced motion design (After Effects). Proven ability to collaborate with cross-functional engineering teams, translate complex requirements into intuitive user flows, and bridge the gap between static design and interactive, scalable products.

PROFESSIONAL EXPERIENCE

TelePerformance Portugal
Apr 2025 – Present
Portugal

Customer Digital Support Engineer

- Develop deep empathy for user pain points by diagnosing and resolving complex technical issues for a global user base.
- Collaborate asynchronously with internal teams to communicate user feedback, supporting continuous product iteration and improved user experiences.

MUSA Formazione & Aulab
Dec 2022 – May 2025
Remote

Technical Mentor — UI & Front-End Integration

- Leveraged deep technical knowledge of HTML, CSS, and Bootstrap to mentor students, bridging the gap between visual design and front-end feasibility.
- Developed comprehensive technical documentation, championing coding and design standards in a collaborative remote environment.

NTT Data
Jan 2022 – May 2022
Italy

UX/UI Designer (Contract)

- Developed user flows, wireframes, and high-fidelity visual designs for complex digital environments using Figma.
- Collaborated with cross-functional engineering and product teams to ensure design consistency and pixel-perfect implementation across web platforms.
- Championed user-centric methodologies, aligning UX designs with technical constraints and business goals.

The Digital Box
Mar 2015 – Feb 2022
Italy

Digital Product Designer & Motion Specialist

- Led visual and interaction design for digital products, from conceptual wireframes to high-fidelity UI deliverables.
- Incorporated advanced motion design and animation into product workflows using Adobe After Effects, enhancing user engagement.
- Partnered with developers to create structured design assets and component libraries, ensuring seamless handoffs.

SELECTED PROJECT

EdTech Platform Redesign
CASE STUDY

Lead UX/UI Designer · w.academy Capstone

Conducted UX research and developed an interactive, high-fidelity UI prototype in Figma. Resolved cognitive overload by transforming a complex interface into a streamlined, minimalist layout. Established a scalable design system that drastically improved the platform's readability and overall user experience for students.
